

How To Change the View of Videos

These screen shots are for Nativity UCC but any Website listing videos using Screencast streaming videos listings would work like this.

By clicking on the row of lines in the upper right corner, you can toggle the list from Icons:

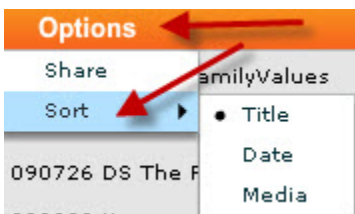

. . . to a list of titles.

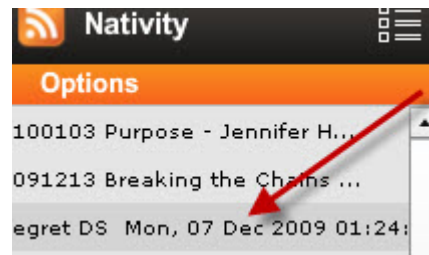

If you click on the word "Options" in the upper left corner, you get a menu. Click on Sort

If you click on "Sort" you will see a further drop down sub menu allowing you to sort by **Title**, **Date** or **Media type**.

If you hold your cursor over one of the titles, the title will scroll left like a marquee over a theater, letting you read the entire title.

You can also use the convenient Search bar at the bottom to look for the title of a video you believe may be listed here.
